<b>Executive Summary</b> .....	8
<b>1 Fire Safety Basics</b> .....	18
<b>1.1 Fire statistics</b> .....	18
1.1.1 World.....	18
1.1.2 Germany.....	21
1.1.3 United Kingdom.....	22
1.1.4 USA.....	23
<b>1.2 Fire hazards</b> .....	24
1.2.1 CO and other fire gases.....	24
1.2.2 Evaluation and analysis of toxic fire gas components.....	25
<b>1.3 Course of a fire and fundamental fire parameters</b> .....	26
<b>1.4 Combustion process and thermal properties of plastics</b> .....	27
<b>2 National and International Fire Safety Regulations and Tests</b> .....	30
<b>2.1 Introduction</b> .....	30
<b>2.2 Building</b> .....	31
2.2.1 Existing national fire regulations, requirements and tests.....	32
2.2.1.1 Germany.....	32
2.2.1.2 France.....	37
2.2.1.3 United Kingdom.....	41
2.2.1.4 USA.....	44
2.2.2 Regulations, construction products, fire performance requirements, and tests in the European Union.....	46
2.2.2.1 The single European market.....	46
2.2.2.2 The Construction Products Directive CPD.....	46
2.2.2.3 Essential requirements and safety in case of fire .....	46
2.2.2.4 CE-Marking.....	47
2.2.2.5 Attestation of conformity.....	47
2.2.2.6 Notified bodies.....	49
2.2.2.7 Harmonised product standards.....	49
2.2.2.8 Classification of reaction to fire of construction products: the Euroclasses.....	50
2.2.2.9 Fire testing of construction products.....	54
EN 13501 Fire classification and EN 13238 standard substrates.....	54
EN ISO 1716 Calorific potential.....	54
EN ISO 1182 Non-combustibility.....	55
prEN 14390 (ISO 9705) Room/Corner test.....	55
EN 13823 Single Burning Item test SBI.....	57
EN ISO 11925-2 Small flame test.....	59
EN ISO 9239-1 Floor covering test.....	59

2.2.2.10 Specific classification and fire tests for wire & cable as construction products.....	60
2.2.3 Conclusions and future developments.....	63
<b>2.3 Fire safety requirements and tests for E&amp;E equipment.....</b>	<b>64</b>
2.3.1 Fire safety requirements.....	64
2.3.2 Fire safety standardization.....	65
2.3.3 Fire safety requirements for E&E materials and finished parts.....	65
2.3.3.1 Flammability tests to IEC 60695-11-10 (UL 94 tests HB and V).....	65
2.3.3.2 Flammability test to IEC 60695-11-20 (UL 94-5V) .....	67
2.3.3.3 Glow-wire tests to IEC 60695-2-10 to 13 and requirements to EN 60335-1.....	68
IEC 60695-2-10	
IEC 60695-2-11 (GWT)	
IEC 60695-2-12 (GWFI)	
IEC 60695-2-13 (GWIT)	
2.3.3.4 Needle-flame test to IEC 60695-11-5.....	69
2.3.4 Fire tests for wire & cable.....	70
2.3.4.1 Vertical burning test on a single insulated wire or cable.....	71
2.3.4.2 Vertical ladder cable test according to IEC 60332-3.....	71
2.3.5 Certification.....	72
2.3.5.1 The CB Scheme.....	72
2.3.5.2 Underwriters' Laboratories (UL) certifications.....	73
2.3.5.3 Approval procedures in Europe and Germany.....	74
2.3.5.4 The Chinese CCC Mark.....	74
2.3.6 New developments.....	75
2.3.6.1 External ignition sources.....	75
2.3.6.2 Outlook.....	76
<b>2.4 Fire safety requirements and tests in transportation.....</b>	<b>77</b>
2.4.1 Road vehicles.....	77
2.4.1.1 MVSS 302.....	77
2.4.1.2 European requirements for buses.....	78
2.4.1.3 Future developments.....	78
2.4.2 Rail vehicles.....	79
2.4.2.1 Fire safety of rail vehicles in the European Union: EU Directives and standardisation.....	79
2.4.2.2 New national requirements for railways in Germany.....	82
2.4.2.3 Future developments.....	82
2.4.3 Ships.....	83
2.4.3.1 The FTP Code fire tests.....	83
2.4.3.2 Revision of the FTP Code.....	84
2.4.4 Aircraft.....	85
2.4.4.1 International fire safety regulations to FAR.....	85
2.4.4.2 Fire protection requirements and tests.....	85
2.4.4.3 Future developments.....	89
<b>2.5 Fire safety requirements and tests in furniture and textiles.....</b>	<b>90</b>

2.5.1 Fire safety requirements and tests in furniture.....	90
2.5.1.1 United Kingdom.....	90
2.5.1.2 European Union.....	91
2.5.1.3 France.....	91
2.5.1.4 USA.....	92
2.5.2 Fire safety requirements and tests in textiles.....	93
2.5.3 Future developments.....	93
<b>3 Flame Retardants: Markets, Families, and Applications.....</b>	<b>94</b>
<b>3.1 Markets.....</b>	<b>94</b>
3.1.1 Market studies on consumption and demand of flame retardants.....	94
3.1.2 Prices for flame retardants.....	97
3.1.3 Producers of flame retardant.....	99
<b>3.2 Mode of action of flame retardants in the combustion process.....</b>	<b>102</b>
<b>3.3 The most important flame retardants.....</b>	<b>103</b>
3.3.1 Introduction.....	103
3.3.2 Halogen-containing flame retardants.....	103
3.3.2.1 Mode of action.....	104
3.3.2.2 Brominated flame retardants.....	105
3.3.2.3 Chlorinated flame retardants.....	116
3.3.3 Phosphorous-containing flame retardant.....	118
3.3.3.1 Mode of action.....	118
3.3.3.2 Organic compounds.....	119
3.3.3.3 Organic halogenated compounds.....	122
3.3.4 Nitrogen-containing flame retardants.....	124
3.3.5 Intumescent flame retardant systems.....	127
3.3.6 Inorganic flame retardants.....	130
3.3.6.1 Introduction.....	130
3.3.6.2 Phosphorous compounds.....	130
3.3.6.3 Aluminium and magnesium hydrates.....	131
3.3.6.4 Boron-containing compounds.....	132
3.3.6.5 Zinc hydroxystannate.....	134
3.3.6.6 Antimony trioxide as a synergist for halogenated compounds.....	134
3.3.6.7 Expandable graphite.....	135
3.3.6.8 Nanocomposites.....	136
<b>3.4 Applications for flame retardants.....</b>	<b>138</b>
3.4.1 Introduction.....	138
3.4.2 Use of brominated flame retardants.....	138
3.4.2.1 Aromatic compounds.....	138
3.4.2.2 Aliphatic compounds.....	140
3.4.3 Use of chlorinated flame retardants.....	140
3.4.4 Use of phosphorus-containing flame retardants.....	141
3.4.4.1 Aromatic phosphate esters.....	141

3.4.4.2	Reactive phosphates, phosphonates and phosphinates.....	141
3.4.4.3	Halogenated phosphate esters.....	142
3.4.5	Use of nitrogen-containing flame retardants.....	142
3.4.6	Use of inorganic flame retardants.....	143
3.5	Some examples for flame retardant formulations.....	144
3.5.1	Formulations for specific flame retardants.....	144
3.5.2	Formulations for specific plastics.....	145
3.5.2.1	PVC.....	145
3.5.2.2	Polypropylene.....	146
3.5.2.3	Styrenics.....	148
3.5.2.4	Polyamides.....	150
3.5.2.5	Linear polyesters PET and PBT.....	153
3.5.2.6	Other.....	154
3.6	Flame retardants trends and innovations.....	155
3.7	Conclusions and outlook.....	159
4	Flame Retardants and Environmental Aspects.....	160
4.1	Introduction.....	160
4.1.1	The dioxin story.....	160
4.1.2	Environmental concerns about flame retardants.....	166
4.1.2.1	Brominated flame retardants.....	166
4.1.2.2	Chloroparaffins.....	167
4.1.2.3	Phosphorus-containing flame retardants.....	167
4.1.2.4	Other flame retardants.....	167
4.2	European Union compulsory activities.....	168
4.2.1	Risk Assessments for existing chemicals.....	168
4.2.1.1	Penta- and octabromodiphenyl ether.....	169
4.2.1.2	Decabromodiphenyl ether.....	169
4.2.1.3	Hexabromocyclododecane.....	169
4.2.1.4	Tetrabromobisphenol A.....	170
4.2.1.5	Short and medium chain chloroparaffins.....	170
4.2.1.6	Halogenated phosphate esters.....	170
4.2.1.7	Antimony trioxide.....	170
4.2.2	EU regulatory framework for chemicals REACH.....	171
4.2.3	Waste Electrical and Electronic Equipment Directive (WEEE).....	172
4.2.4	Restriction of Hazardous Substances Directive (RoHS).....	174
4.2.5	EU Water Framework Directive.....	175
4.3	Environmental activities in European standardization.....	176

4.3.1 EN 71 Safety of toys.....	176
4.3.2 IEC/TC 111 Environmental Standardisation for E&E Products and Systems...	176
4.3.3 CEN/TC 351 Construction products: Assessment of release of dangerous substances.....	177
4.4 Other environmental activities in Europe.....	178
4.4.1 Ecolabels.....	178
4.4.1.1 European ecolabel.....	178
4.4.1.2 German Blue Angel.....	180
4.4.2 TCO-Mark.....	182
4.4.3 Consumer test magazines.....	184
4.4.4 Green procurement.....	185
4.4.5 E&E OEMs green programmes.....	186
4.4.6 GADSL and green programmes of the automotive industry.....	187
4.4.7 Activities of European industry associations and organizations regarding flame retardants.....	189
4.4.7.1 PlasticsEurope.....	189
4.4.7.2 CEFIC/EFRA.....	190
4.4.7.3 CEFIC/EBFRIP.....	191
4.4.7.4 BSEF.....	191
4.4.7.5 IAOIA.....	192
4.4.8 Activities combining fire safety and the environment.....	192
4.4.8.1 ACFSE.....	192
4.4.8.2 Industry sponsored activities for fire safety and the environment.....	192
4.5 Environmental activities on national level.....	198
4.5.1 Germany.....	198
4.5.1.1 Introduction.....	198
4.5.1.2 TCDDs and TBDDs in the Chemicals Banning Ordinance.....	198
4.5.1.3 Flame retardants banned and restricted in Germany.....	199
4.5.1.4 WEEE-Germany: ElektroG.....	199
4.5.1.5 Environmental Protection Agency UBA.....	200
4.5.1.6 Ökorecherche Study: Substitution of environmentally relevant flame retardants.....	200
4.5.1.7 BAM Research Project 2003: Flame retardants emissions from building products and consumer goods.....	201
4.5.1.8 TÜV Nord Project: Flame retardants in automotive interiors.....	204
4.5.1.9 Position of German industry associations to flame retardants.....	206
4.5.2 Denmark.....	207
4.5.3 Netherlands.....	207
4.5.4 Sweden.....	207
4.5.5 Switzerland.....	209
4.5.6 United Kingdom.....	210
4.5.7 USA.....	211
4.5.8 China.....	214
4.6 International activities.....	216

4.6.1 OSPAR Protection of the Marine Environment of the North-East Atlantic.....	216
4.6.2 Ecological pressure groups.....	217
4.6.2.1 Greenpeace.....	217
4.6.2.2 WWF.....	218
4.6.3 IPCS/EHC monographs on flame retardants.....	219
4.7 Conclusions and outlook.....	221
5 Future Developments.....	226
